

Physical Education

Netball Year 3

Unit Purpose

The unit of work will **explore** how to **apply** the principles of **attack** vs **defence**, with a particular focus on passing and moving.

Pupils will learn how to keep **possession** and eventually score in order to win a modified game.

Inspire Me

Serena Monique Guthrie MBE is a netball player from Jersey who plays internationally for England. She plays in the Centre and Wing Defence positions. She is a dynamic player, known for her speed and athleticism.

Key Success Criteria

- P** Pupils will develop their passing and moving skills to outwit their opponents and keep possession of the ball.
- C** Pupils will apply an understanding of where, when and why we pass and move, in order to score points against another team.
- S** Pupils will develop life skills such as respect and communication as they collaborate with others including their opponents.
- W** Pupils will apply their skills with developing confidence as they grow in their ability to show resilience and determination.

Vocabulary for Learning

Attacker: We are considered an 'attacker' when we are in possession of the ball or in control of the ball. A player whose task is to attack the opposition in an attempt to score. Space for one more line!

Defender: We are considered a 'defender' when we are not in possession of the ball or when the ball is not in our control. A player whose task it is to prevent the opposition scoring and to regain possession.

Possession: Is when we have physical control of the ball or other implement of play. This could be when working individually or as part of a team. It is when we have 'possession' that we can create the opportunity to score.

Sport Specific Vocabulary

Chest Pass: Is thrown by gripping the ball on the sides with the thumbs directly behind the ball. When using a chest pass, the passer should strive to throw the ball to the receiver's chest level.

Footwork: A player can receive the ball with both feet grounded or jump to catch the ball and land on two feet simultaneously. The landing foot cannot be moved, other than to pivot on the spot, whilst the other foot can be moved in any direction.
